Detailed information on the individual doctoral programmes ó included in the appendix to the public notice of admission ó may specify the precise degrees required for admission to the selection procedure.

This information specifies the places available on the courses, including any places with specific research questions (with grants for specified research), funded under certain Programs / Projects or agreements with external bodies which foresee mandatory research on a precise topic which has already been specified in the public notice.

Places with specific research questions, for the purposes of this announcement, are those places, specified in the detailed information, which, by their nature, cannot be assigned purely and simply on the basis of general merit of the selection procedure but require further specific evaluation beyond that of the general assessment.

The choices expressed by the candidate are irreversible.

A successful application for a research place on a specific question automatically implies its acceptance.

If impediments of any kind do not permit the respect of the examination schedule as indicated in the previous paragraph, the Administration will publish a notice with all the necessary changes, within three days prior to the date set for the first test.

This notice will be published exclusively on the website of the Università del Salento at www.unisalento.it in the "News" section and the dedicated section "Dottorati di Ricerca / Bandi per Dottorati di Ricerca".

Both will be considered as notification to participants.

The evaluation will be carried out by a Board of Examiners that will be appointed by the Rector and composed of three members that will be chosen among professors and researchers in the doctoral

area of interest; to such members it will be possible to add no more than two experts, also chosen from foreign institutions and public as well as private research institutions.

Pursuant to Art. 16 of the Code of Ethics "*Obligations of effectiveness in comparative evaluations*", as also stated in DR. 1323 (19/11/2012) from our University:

"... 1. In all comparative evaluations for the award of scholarships, doctoral, post-doctoral or research grants or specialization contracts as well as in competitions for research positions and in all the procedures of recruitment, transfer or recruitment of professors and in the conferment of teaching courses to any committee members belonging to the University staff regardless of their role, they must state that they have read Chapter II of the Code, indicate and justify any infringement of such rules.

2. All the teaching staff is committed to ensure that the scientific and professional collaborations between themselves and their employees are not based on commonality of personal interests that give rise to the suspicion that any comparative assessments of the candidates are not carried out on the basis of objective findings, but by virtue of personal acquaintance with the Commissioner ... "

The procedures for admission to the course and the corresponding scores are indicated in the summaries of PhD programmes (App. A to M of this notice).

The exams will be held to determine not only the knowledge acquired with reference to the research areas of the PhD program, but also the scientific maturity, flexibility, resourcefulness to face possibly new areas of research.

The selection is carried out, according to art. 13, paragraph 3, of the University Regulations on PhD studies, by:

- a) the assessment of qualifications;
- b) the assessment of a written test or a research project, depending on the provisions of the individual details accompanying the courses;
- c) an interview aimed at verifying the candidate's knowledge and aptitude in research on areas of the doctorate.

Candidates are admitted to the interview if they obtain a score of at least 30/100 in the evaluation of the written exam or research project of letter. b) of the preceding paragraph.

The communication of the results of the evaluation of the first test (written or research project testing) will be as specified in the doctoral detail, attached to this notice, which forms an integral part (Appendix. A to M).

In the event that a candidate has submitted an application for a place with specific questions, as well as for a general places, the interview will be on the general issues as well as the specific theme and will therefore be carried out separately but in the same place and date.

The first two tests (assessment of the research project or written test and assessment of qualifications) and its score will be common to both types of places (general and specific themes).

The third test (interview) will be carried out separately, at the same meeting, for the post of a general theme and for that for a specific theme specified by the applicant, according to the procedures described in the preceding paragraph and will give rise to distinct and separate scores.

If permitted by the PhD programme details, attached to this announcement, there is the possibility, only for applicants residing abroad, to carry out, on request, the interview via a video call using "Skype".

In this case, the candidate can make this request also in writing with an email sent to the address protocollo@unisalento.it and ufficio.dottorati@unisalento.it up to five days before the date of finalization of the interview, indicating simultaneously a valid Skype account and a copy of an identity document enabling the identification of the video call session.

The "Skype" interview will be held on the same day fixed for the Doctorate interview.

At the end of the examinations, the Commission will draw up a separate list for each type of place (general places on the one hand, and places bound to a specific research question on the other) summing for each type the score received by the candidates in the three different tests (research project or written exam, qualifications and interview).

The selection is considered passed if the applicant achieves, as an outcome of the three tests prescribed for each type of post, an overall score of at least 65/100.

Candidates who have not obtained a grade of at least 65/100 in the ranking for the posts of a general nature shall not be placed in the rankings for places for specific research questions.

Candidates who have opted to compete for both general and for a place with a specific research question with a grant and have passed the tests will be placed, subject to the conditions referred to in the previous paragraph, in the two separate rankings with relative scores.

In the event that the same candidate is the winner, at the same time, of a general place with grant and a place with a grant for a specific research question, the Administration will proceed to give him/her the place with the specific research question.

The winner of a place for a general theme who is enrolled on the programme will be required to accept the place on a specific question with a grant, if those before them refuse the post. Grants for specific questions will not be awarded if there are no winners for the specific themes.

The general places, with or without a grant, and places with a grant on a specific research question will be awarded with Rector's decree to applicants who are at the top their rankings up to the number of places available for each programme, based on the principles and according to the procedures described before.

If candidates have the same score, the youngest applicant has precedence in accordance with art. 2, paragraph 9, of Law no. 191/98.

Where a grant must also be attributed, however, the following criterion is applied art. 7, fourth paragraph, of D.M. n. 224/99, namely the assessment of the economic situation.

In case of a tie, therefore, the scholarship will be awarded to the winner in possession of lower ISEE.

The list will be approved by the Rector by decree and published at www.unisalento.it in the section on Research Doctorates of links "Tenders and contests" (Bandi e Concorsi), as well as the online section of official registers, with parties concerned being notified in this way.

This Administration will not send personal messages to interested parties considering the publication of the rankings in the forms and in the manner described above.
